

MAKE THE MOVE TO PAPER

THE SUSTAINABLE SOLUTION

Made from a renewable resource, paper bags provide the perfect alternative to single-use plastic bags.

Unlike other alternatives, paper bags are ...

- ✓ Reusable
- ✓ Recyclable
- ✓ Compostable

When made from quality, sustainable raw materials, paper bags offer equal or better strength than their plastic equivalents. These bags have multiple end of life options – that means that they won't contribute to environmental damage, making them a truly sustainable solution when sourced from an ethical manufacturer.

Made from 100% recycled, locally manufactured paper.

100% renewable, compostable & recyclable.

High quality custom printing displayed on large flat sides for superior brand presentation.

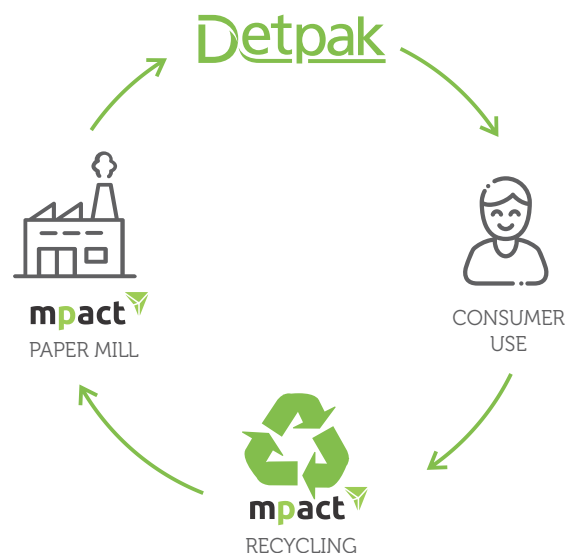

Unlike degradable plastic bags, paper bags break down completely. A degradable plastic bag only breaks down into smaller fragments.

Self-standing allowing items to be neatly stacked into the bag.

Very strong and can hold up to 13 kg in weight.

At Detpak, we use 100% recycled, locally sourced paper for manufacturing

Detpak forms part of the Mpact Group. Together we take responsibility for the full life cycle of paper bags in South Africa.

THE BETTER ALTERNATIVE

Our Detpak paper bags are an environmentally-friendly alternative to single-use, lightweight plastic bags. Made from 100% recyclable, locally sourced paper, they are 100% renewable, home recyclable and compostable. Detpak paper bags are also reusable and strong, with our largest bag holding up to 13kgs.

See how traditional single use plastic bags compare with Detpak bags below.

MOVING TO PAPER? HERE'S HOW!

Small Singlet Bag
300 x 230 x 130 mm
